Question: 21. In what way was this course most helpful to you?	
Student	Detail
732570	He gave a lot of media examples which engages us more, and made learning more interesting
734376	The course was helpful to me by allowing me to reflect on my habits as a consumer of media.
734699	It taught me to write better essays
737203	It honestly hasn't
737741	I think group activities were the most helpful part of this class. Having to build strong arguments for debates and being creative in thinking about ways to advertise products for example were great ways of making this course more helpful and interesting.
739064	It provided modern-day examples
740244	It helped me to understand many basic concepts of communication through various forms of media.
744928	The amount of assignments and level of expectation. Also, as someone who struggles a great deal with social anxiety/public speaking, it was really nice that the professor put most of the grading emphasis on the quality of work that you produced instead of how many times you speak in class.
745419	Interesting and relevant information on subjects I care about as a journalism major
748038	It has helped me explore the subject matter of mass communication and it's changes through out the years,
748262	Not very helpful
749063	The course covered a wide variety of significant topics.
761341	it was a gen ed.
765612	It was a good intro to communications.
766369	This course changed the way I think about the world and how humans communicate. It changed my mindset about certain media.
768928	The class discussions were engaging and the way lectures involved current media in relation to the topics covered in the text made the class relatable and interesting.
769028	In improving my writing skills

Question: 22. How could this course be improved?	
Student	Detail
732570	it was good.
734376	Quizzes could be set up earlier in the quarter. The professor was great, and I almost wanna say he was TOO academic for undergraduate. I did not speak up a lot because I was still working my way in my mind through his questions. I also wish the lectures went over the textbook material in a more general way, not so specific. The class was very low key, and I almost wished it was a bit harder because I did not feel I tried at all because it was low-key and easy. The group work we did in class was not as effective, if the group work was maybe assigned outside of class and more formal, it may be more productive.
734699	not writing 4 page essays, do 2 pages instead
737203	By simplifying the material. It's an introduction to mass communication... Not mass communications. A teacher less qualified would have helped me more.
737741	I don't think the course needs to be improved. It was both a challenging and fun course. Also, the topics we had to write our papers about were very interesting, which

	made the papers enjoyable and definitely not "boring".
739064	More adherence to learning objectives
740244	Some class time could perhaps be used more effectively, as many in-class group projects seemed to take too much time that could be used for other things such as lectures or videos.
744928	It felt as if the professor was new to teaching and is still finding this flow. Many of the time he either trails off or asks a question that is vague or confusing to the entire class. Collectively, the class is most always unsure of what the professor is asking us and instructions for group projects as well. It's good that the professor tries to switch things up each class period by focusing each session on discussion, group work, etc. though it ends up feeling very scattered. Another thing is that the professor spends too much lecture time discussing the readings in almost full detail, which is very redundant and repetitive to those who did the reading before class. spend less time reviewing the reading in too much detail - ask more discussion questions be more explicit when you are posing a discussion question / prompt base the majority of the class in one or two formats and switch it up only every so often
745419	Maybe go more in depth with subjects
748038	None/ Good course for me thumbs up!
748262	Less group work and more interesting content.
749063	Less group work and more class discussions
761341	stop making it a gen ed.
765612	Not sure
766369	This course could be improved with more rigorous assignments that make us work harder and think more deeply. It is an introductory course but I think we could have done more in the amount of time we had.
768928	I think the group work exercises were effective so the course could be improved with more of these exercises that involve applying the material covered in class.
769028	More assignments

Question: What were the instructor's strengths? Weaknesses?	
Student	Detail
732570	Had great examples, but would go through prezi slides pretty quickly. I liked the amount of group work, it helped make a community in class. He also seemed a little uptight sometimes, which didn't always match what he was saying.
734376	the instructor's strength was his great understanding of the material. His weakness was how specific the lectures were about the reading. I'd like a more comprehensive lecture rather than on a specific part of the reading. I feel focusing on specific parts of the reading should be left for the quizzes.
734699	He taught well
737203	He was very intelligent. But he overcomplicated everything he said
737741	The instructor went beyond covering the material of the book which made the class much more interesting. Relating the book topics to recent TV shows, movies, and social media was one of the best ways to make the course material much easily approachable to his students.
739064	The instructor was very knowledgeable on the subject, but did not seem to have much specific information he was trying to teach.
740244	The course materials and topics were very well explained and clearly shown through examples. Some group projects, however, felt rushed or misunderstood by students and in some ways felt unproductive.
744928	I addressed this in the second to last page of this evaluation
745419	Knowledgeable on the subjects. Sometimes it seemed a bit like the lesson or groupwork assignment was kinda thrown together at the last minute or it was the first time the instructor had tried them
748038	Great sense of knowledge in class course. Lack to connect with the rest of the class, some students didn't understand him much.
748262	It was hard to understand the assignments because of the vocabulary used
749063	The instructor had a lot of information and was really well prepared for the topic of discussion. However, the group work's purposes were sometimes a little unclear.
761341	good conversation but not to exciting, that is more the topic's fault then the teacher.
765612	The class discussion was interesting, but at times the way Professor Jones asked questions was confusing. Also, Professor Jones trails off his sentences and at times it can be hard to hear the ends of his stences.

Question: What were the instructor's strengths? Weaknesses?	
Student	Detail
766369	The instructor's biggest strengths were his knowledge on the subject matter and organization of somewhat abstract information in prezis. The biggest weakness was being unable to get the students excited about the class more frequently to get them engaged.
768928	The instructor was always very engaging with students and respectful of/seemed genuinely interested in students' opinions and ideas. He was very good at listening to what everyone thought and expanding on their ideas which was encouraging and made the class enjoyable. I think I learned more from this instructor than most because of the way he led and engaged in class discussions and made the material relatable.
769028	Strengths are that he knows what he is talking about. Weaknesses is that sometimes he doesn't get his message across in a clearer way.

Question: How productive was class discussion?	
Student	Detail
732570	It was really productive, because we did a lot of group work we were used to talking to each other and sharing opinions so I feel like people were more open to sharing than my other classes
734376	It was decent enough. The people who have had practice or a lot of familiarity with the material like video games and film largely led discussion. I feel discussion could be focused more on experience rather than analysis.
734699	good
737203	Productive only when people raised their hands
737741	Class discussion (including group presentations and debates) were very productive. I wish this way of covering a course's material is used more often in other courses. It helps students interact with each other, do researches and know better information about a topic, and it also creates a challenging and competitive environment.
739064	Productive
740244	Class discussion felt very productive, providing a natural way for students to discover new areas of the topics and strong realizations.
744928	fairly productive
745419	When the class participated, it was pretty engaging
748038	very productive, had everyone thinking outside the box.
748262	somewhat
749063	Very productive; we were always learning something.
761341	it was ok, not incredibly productive but more or less helpful.
765612	Great!!!
766369	When students were participating then the discussion was highly productive and made the class enjoyable. However, if the students weren't prepared or interested then the discussions dragged. The discussions improved greatly as the quarter progressed.
768928	Class discussion was very productive
769028	Very productive

21	21. In what way was this course most helpful to you?	0	It helped me to understand many basic concepts of communication through various forms of media.
22	22. How could this course be improved?	0	Some class time could perhaps be used more effectively, as many in-class group projects seemed to take too much time that could be used for other things such as lectures or videos.
23	23. Why did you take this course?	1	Required in Major/Minor/Prog.

31	31. I understood what was expected of me in this course.	5	Always
32	What were the instructor's strengths? Weaknesses?	0	The course materials and topics were very well explained and clearly shown through examples. Some group projects, however, felt rushed or misunderstood by students and in some ways felt unproductive.
33	How productive was class discussion?	0	Class discussion felt very productive, providing a natural way for students to discover new areas of the topics and strong realizations.

20	20. I would recommend this course to others.	2	Disagree
21	21. In what way was this course most helpful to you?	0	The amount of assignments and level of expectation. Also, as someone who struggles a great deal with social anxiety/public speaking, it was really nice that the professor put most of the grading emphasis on the quality of work that you produced instead of how many times you speak in class.
22	22. How could this course be improved?	0	It felt as if the professor was new to teaching and is still finding this flow. Many of the time he either trails off or asks a question that is vague or confusing to the entire class. Collectively, the class is most always unsure of what the professor is asking us and instructions for group projects as well. It's good that the professor tries to switch things up each class period by focusing each session on discussion, group work, etc. though it ends up feeling very scattered. Another thing is that the professor spends too much lecture time discussing the readings in almost full detail, which is very redundant and repetitive to those who did the reading before class. spend less time reviewing the reading in too much detail - ask more discussion questions be more explicit when you are posing a discussion question / prompt base the majority of the class in one or two formats and switch it up only every so often

32	What were the instructor's strengths? Weaknesses?	0	The instructor's biggest strengths were his knowledge on the subject matter and organization of somewhat abstract information in prezis. The biggest weakness was being unable to get the students excited about the class more frequently to get them engaged.
33	How productive was class discussion?	0	When students were participating then the discussion was highly productive and made the class enjoyable. However, if the students weren't prepared or interested then the discussions dragged. The discussions improved greatly as the quarter progressed.

32	What were the instructor's strengths? Weaknesses?	0	The instructor was always very engaging with students and respectful of/seemed genuinely interested in students' opinions and ideas. He was very good at listening to what everyone thought and expanding on their ideas which was encouraging and made the class enjoyable. I think I learned more from this instructor than most because of the way he led and engaged in class discussions and made the material relatable.
